

NORSAP

THE GLOBAL LEADER IN PILOT,
OPERATOR AND HELMSMAN CHAIRS

We are proud to be the world's leading manufacturer of operator chairs. For many years Norsap has developed and delivered high-quality products to customers worldwide. It's a privilege to have the opportunity to work with competent partners that allow us to improve our products' competitiveness and further strengthen our brand.

In Norsap, we strive to have a flat organizational structure, and I know all employees personally. We have a company culture that reflects involvement, fast decisions, focus on quality, honesty and a strong commitment. All our employees can influence our products, improvements and how we work.

We also have owners with a strong interest in the company, and they allow us to invest in new products, skilled people and modern facilities. When our sales department continues their contribution to our growth, developing existing and new customer relations, it inspires us all to carry on.

Norsap measure the use of energy, packaging and waste. We evaluate our levels compared to our goals and aim to contribute to a more sustainable industry.

Norsap has more than 50 years experience and is more economically robust, modern and efficient than ever. We look forward to further developing and improving the products, investing in our employees, and creating added value for our customers in the years to come.

- Ove Jensen
CEO - Norsap AS

PRODUCT MAGAZINE

THE GLOBAL LEADER IN PILOT,
OPERATOR AND HELMSMAN CHAIRS

DESIGNING BUILDING NORSAP

Norsap was established in 1969 as a one-man company. Its main product was aluminum snow shovels. The range soon expanded to include a wide variety of products such as boating equipment, aluminum doors and screens, all known for their high quality.

Over the years, we've developed and strengthened our expertise and skill set within aluminum production and assembly.

Norsap serves the global market from modern manufacturing facilities outside the port city of Kristiansand, Norway.

Dedicated to always meet our customers demands, Norsap supply world-class quality products in accordance with our ISO 9001 and ISO 14001 certification.

In order to maximize customer satisfaction and be the best possible partner, we are continuously developing our product range of both general and customized solutions.

WHY ALUMINUM?

Aluminum is the third most abundant element in the earth's crust, after oxygen and silicon. There is, in other words, more aluminum than iron in this world, and the resources will last for generations with today's aluminum consumption.

A piece of aluminum weighs only 1/3 of one in steel. In addition to making it easier to handle in a factory or on a building site, aluminum's low weight also translates into reduced energy consumption during transportation. This makes aluminum not just a lightweight and versatile choice of material, but also economically viable and environmentally friendly.

Aluminum reacts with the oxygen in the air, forming a protective oxide coating that makes it corrosion resistant. This means less maintenance and replacements compared to metals like iron or steel. Reduced maintenance and less need for replacements are good news for both the environment and the overall budget of any project.

Few materials are as easily recycled as aluminum. It requires only 5 % of the energy needed to produce the initial primary metal to recycle it. In fact, 75 % of all aluminum ever produced is still in use.

NORSAP AT THE HELM

The best helm chairs are made with high-quality materials that are also lightweight and durable. They should meet the specific vessel's needs in which they will be used. For example, they enhance the interior design or integrate with vital steering components.

Helm chairs by Norsap can meet these needs no matter what type of vessel – whether it be a supply yacht or an angler in The Arctic Ocean. From sunny skies and warm weather to the harsh arctic winter far from any coast, Norsap helm chairs are present.

Contact one of our many dealers and agents worldwide, or contact our head office located in Kristiansand to tell us what you need from your helm chair.

NORSAP 1000 and **NORSAP 1500** may be our most popular helm chairs, with or without extras like deck rails and joystick boxes. We believe there are no vessels these chairs won't fit and no conditions these chairs cannot survive.

NORSAP 1100 is present on military vessels and luxury yachts. Its slim and modern design does not compromise the comfort or function you can expect from this helm chair. The range of options for color, leather and backrest height offers a rare number of possibilities for a chair like this.

NORSAP 1600 has the strength of Norsap 1500, with a modern design. Given the full leather or aluminum backrest, you can find just what suits your vessel.

NORSAP 1800 offers a wide range of possibilities which includes several ergonomic adjustments. This chair can be adjusted to fit anyone.

Lynx Yachts Crossover 27

There are moments in life when the body and mind demand balance and the desire for a machine that encompasses the best of two worlds. Lynx Yachts' Crossover Series embodies this thinking and offers a range of vessels that provide the versatility of the YXT Series with the elegance and style of the Adventure Series. The Crossover is neither one nor the other but something in between and firmly ahead of the game.

ICONS

HOW TO ADJUST

- 

Manual adjustments
Adjustments need to be unlocked and put into the desired position.
- 

Assisted adjustments
Adjustments are assisted into place with a positive or negative air spring.
- 

Electric adjustments
Adjustments are assisted into place with an electric actuator or motor.

ADJUSTMENTS

- 

Adjust Backrest angle
Adjust your backrest for focus or comfort.
- 

Adjust Seat height
Depending on your upper arm length.
- 

Seat sliders
Get closer to the bridge.
- 

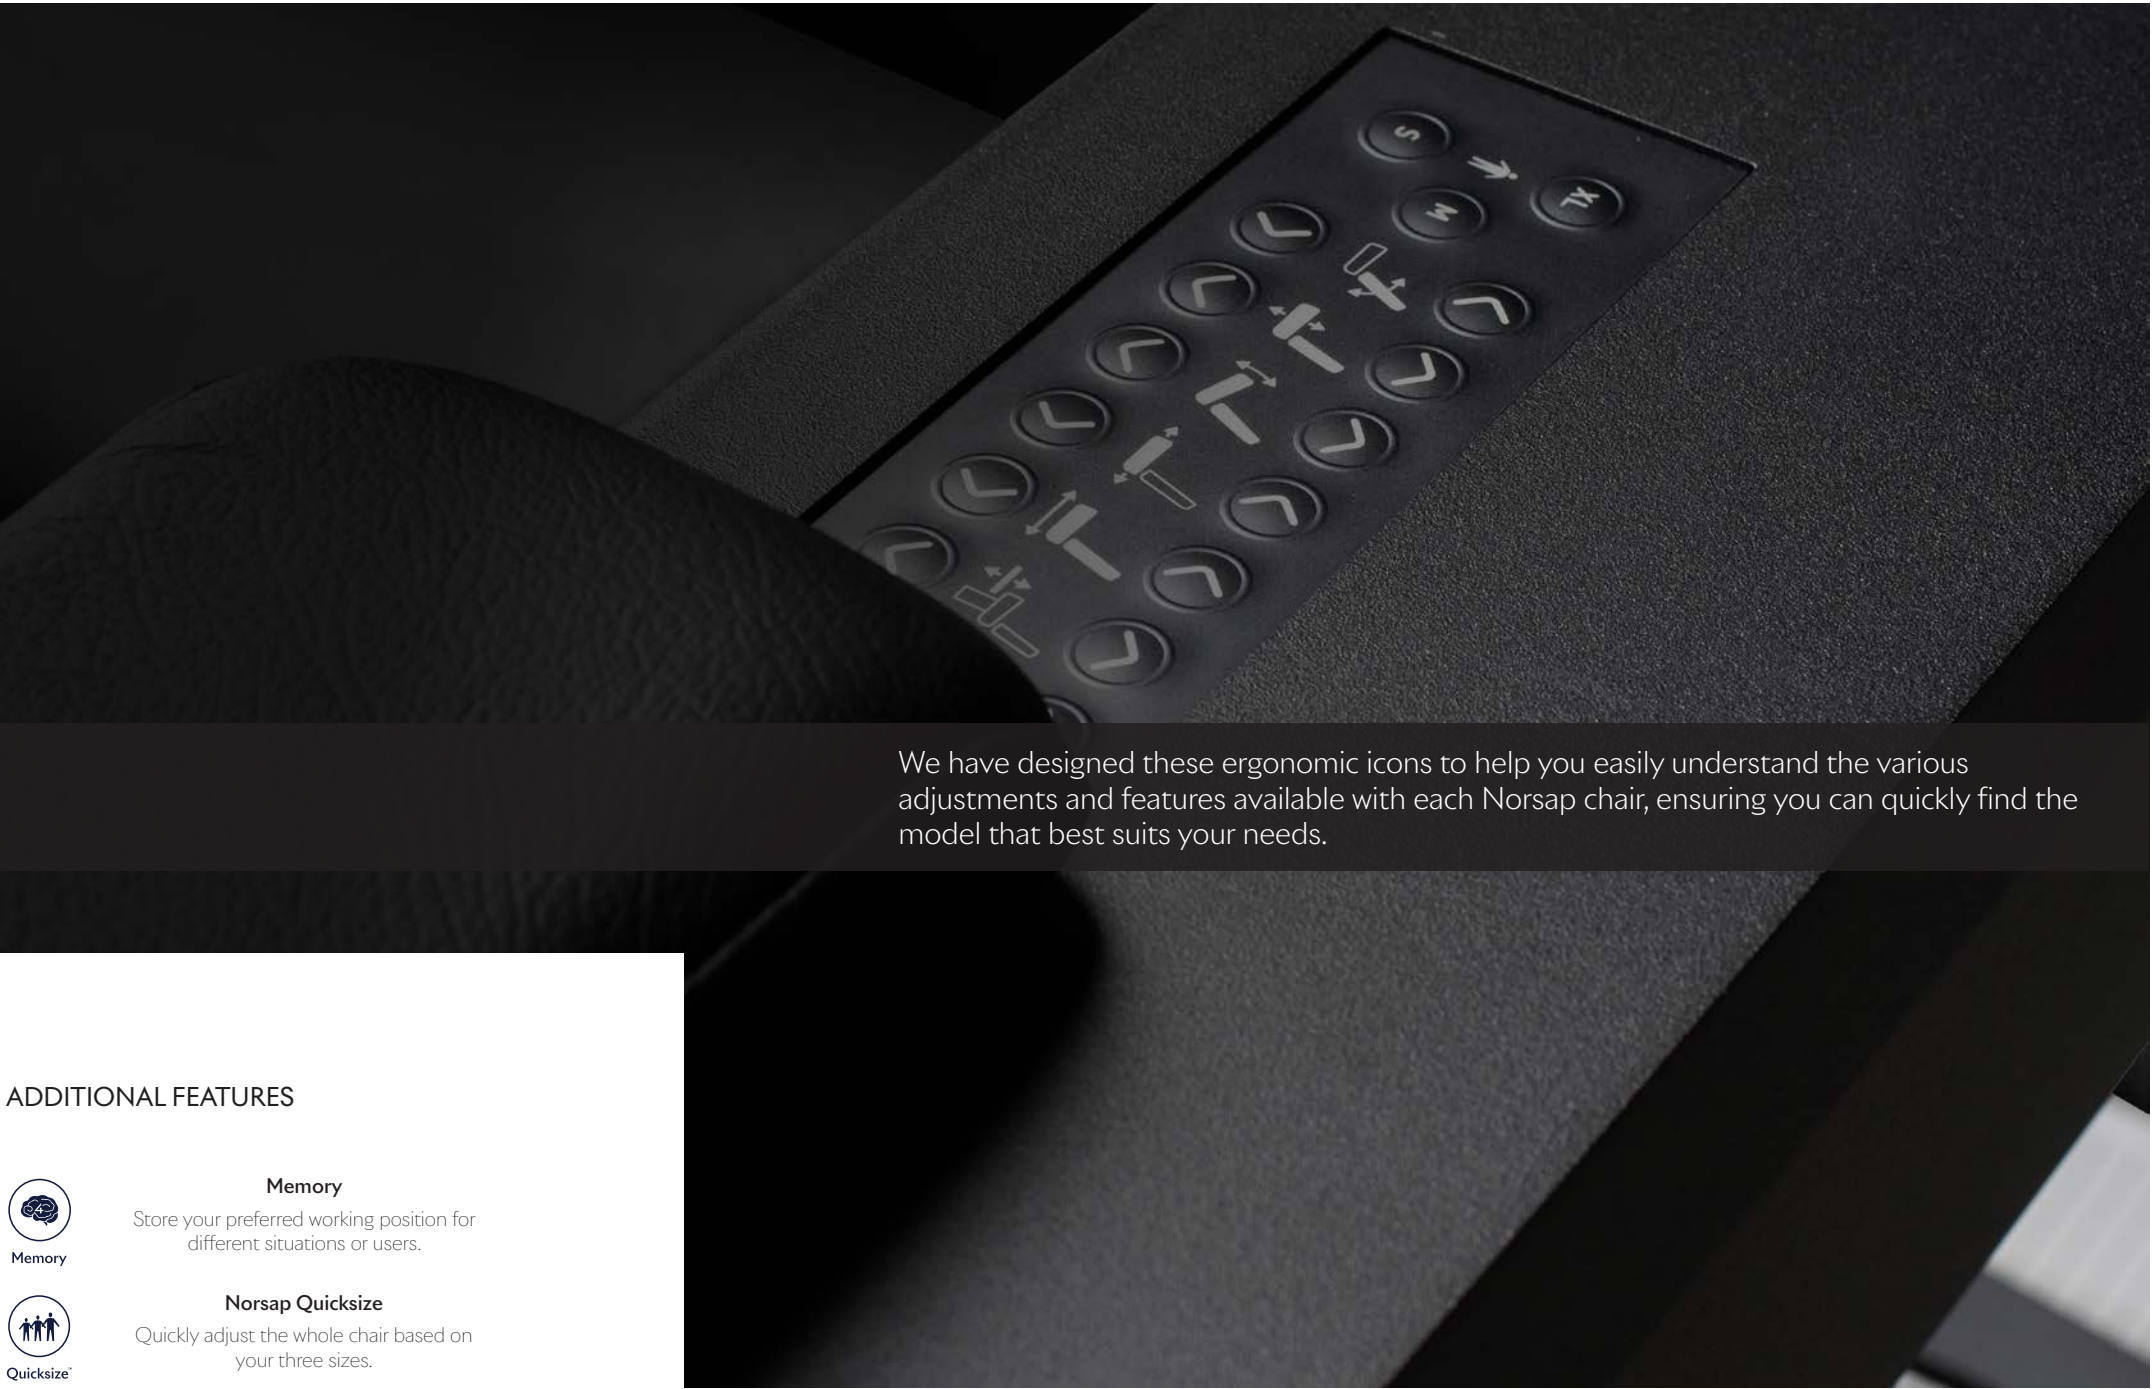

Seat pan front tilt
Adjust the angle on the seat pan.
- 

Adjust Back tilt
Adjust the angle on the seat pan.
- 

Adjust Front tilt
Adjust the angle on the seat.
- 

Seat pan depth
Depending on your upper leg length.
- 

Sit / Stand transition
Shake loose.

We have designed these ergonomic icons to help you easily understand the various adjustments and features available with each Norsap chair, ensuring you can quickly find the model that best suits your needs.

ADDITIONAL FEATURES

- 

Memory
Store your preferred working position for different situations or users.
- 

Norsap Quicksizer
Quickly adjust the whole chair based on your three sizes.
- 

Shock mitigation
Operate for longer.
- 

Flip up footrest
Flip the footrest away to get more space in front of the chair or when not in use.
- 

Flip up seat
Makes the chair smaller.
- 

Flip up armrests
Get easier and faster out of the chair.
- 

High Speed Craft
Go to norsap.no to see certificates.

SEAT AND TABLE ADJUSTMENT

- 

Seat sliders
Get closer or further away.
- 

Fixed column
For a fixed and clean looking column.
- 

Twist-Lock
Remove or relocate the column.
- 

Adjustable column
Adjust your height.
- 

Column rotation
Rotate the seat or table.
- 

Spring suspended
More comfort.

1060 - Norsap 100 Jockey - Nyx upholstery
1070 - Norsap 100 Jockey - Integral foam

THE SEAT'S LIGHTWEIGHT DESIGN CONTRIBUTES TO IMPROVED ACCELERATION, MANOEUVRABILITY, AND REDUCED CARBON EMISSIONS DUE TO ITS LOW WEIGHT.

The **Norsap 100 Jockey** Seat is designed for RIBs and fast boats, providing exceptional protection and convenience. Its dynamic suspension reduces shock and vibration, minimising fatigue and injury risks. This light weight seat improves acceleration, maneuverability, and speed while being environmentally friendly.

Ideal for marine use, it features water-resistant cushions and corrosion-resistant components. The compact design (W286mm x D439mm) allows for easy installation, removal, and sliding, and optimizing on-board space. The adjustable cushion accommodates all body sizes for personalized comfort.

PERFORMANCE

NORSAP 150 art.nr
Go to norsap.no for more models.

- 1000 - Norsap 150 Performance - Seat only
- 1010 - Norsap 150 Performance - Explore Outdoors
- 1015 - Norsap 150 Performance - Explore Indoors
- 1020 - Norsap 150 Performance - Ultimate Outdoors
- 1025 - Norsap 150 Performance - Ultimate Indoors
- 1050 - Norsap 150 Armrests - Add on

THE NORSAP 150 PERFORMANCE IS A DEDICATED SUSPENSION SEAT FOR MARITIME USE. THE SEAT HAS AN ORGANIC DESIGN WITHOUT PROTRUDING OR SHARP EDGES FOR SAFETY AND CONVENIENCE.

The **Norsap 150 Performance** is engineered to protect crew and passengers in high-performance crafts or various operations in demanding conditions. Our dynamic suspension technology, similar to the Norsap 100 Jockey seat, reduces the harsh impact of shocks and tiring vibrations, reducing the chance of fatigue or body injury.

The Norsap 150 Performance features built-in side support and a backrest that promotes good posture for a comfortable ride. Its organic design eliminates sharp edges for enhanced safety. The seat also offers 4-point and 2-point belts, plus armrests and joystick enclosures for added convenience.

Norsap 150 Ultimate Performance is perfect for faster demanding operations in harsh and challenging conditions. Norsap Ultimate Performance is also recommended for heavier users on such as SAR or faster leisure boats in less demanding seas.

Norsap 150 Explore Performance is ideal for SAR and leisure at lower speeds.

NORSAP 500

ECO

Norsap 500 ECO is all about traveling in comfort and style without leaving a heavy footprint behind. Fit more chairs on each row with less weight per seat without compromising design and comfort. Norsap 500 ECO will always be a versatile and timeless chair for your passengers. It has never been more important to travel together with less.

The Norsap 500 ECO can be fitted with all the necessary accessories that the passengers may need: a fold-up table, USB chargers, flip-up or fixed armrests, a net for storage, hooks for personal belongings and space for life jackets under the seat. Choose between two different locations to place the release handle to set the backrest in their preferred position or fixed backrest.

THE NORSAP 800 IS MORE CAPABLE THAN THE PRICE AND LOOKS WOULD INDICATE. WITH SIX ERGONOMIC ADJUSTMENTS, THIS MAY BE THE BEST CHAIR FOR THE TIGHTEST SPACES AND BUDGETS.

Norsap 800 is a perfect and compact helm chair for smaller wheelhouses and bridges without compromising ergonomic design and comfort. The series has an 80 mm diameter column in various heights, and the flanged base has six mounting points for secure fastening to the deck. The chair is designed to integrate with a deck rail, delivered as a flush or top-mounted rail. The seat features various adjustments to allow the best ergonomic position when seated.

THE NORSAP 1000 IS ALSO THE SMALLEST CHAIR THAT CAN ACCOMMODATE ADD-ONS SUCH AS ENCLOSURES FOR JOYSTICKS AND BUTTONS YOU MIGHT NEED ON THE CHAIR.

Norsap 1000 is a chair that fits in most vessels. There are options of having accessories integrated into the armrests such as joysticks, cup holders, mouse or note tables. The chair is mounted on a 100 mm diameter column, creating a firm base for the footrest and seat. The flanged base is designed for permanent deck mounting but can also integrate with an optional deck rail solution. The chair features various adjustments to allow for the best ergonomic position when seated. Standard adjustments are the backrest, seat position on glide rails, 360° rotation, gas-dampened height adjustment, flip-up adjustable armrests and fold-up footrest.

THE PERFECT CHAIRS FOR RUGGED ENVIRONMENTS.

The **Norsap 1500** and 1700 series are the perfect chairs for rugged environments. These chairs are designed to be lightweight and compact controller chairs, with armrests that can be fitted with numerous control options specific to each application. They include many standard features and have additional options to build the right solutions for the most demanding jobs. Each chair is mounted on a 150 mm diameter column, creating a firm base for the footrest and seat. The flanged base has a large footprint with six mounting holes for secure fastening to the deck and can also be integrated with a deck rail delivered as a flush or top-mounted rail. The seat features various adjustments to allow for the best ergonomic position when seated, such as armrest, backrest, seat position, height and rotation. Other available options are lumbar support and add-on controllers to the armrests.

NORSAP

INNOVATION & DESIGN

Making a perfect chair is one of the classic industrial design challenges that many designers dream about. In many ways, it defines the essence of what industrial design is all about: «Bridging the gap between man and machine.»

In our case, a chair does not only have to be aesthetically pleasing and comfortable. It also has to perform according to marine regulations and fit our customer's unique requirements. At Norsap, we have an in-house design team ready for your disposal, whether it's a minor fix to one of our standard chairs or a completely new and exciting concept.

One of the most rewarding moments of a designer's job is sharpening the pencils and sketching away for hours, creating a wall of ideas. Then comes months of adjustments, engineering and testing.

The second most rewarding moment is the first time you glimpse the finished product at the bridge of a ship and recognize the DNA of the Norsap design. Perhaps in the form of the distinct shoulder line, side profile, or the Y-shaped upholstery pattern. In terms of developing a particular design language, we must consider the product's long life span. Therefore we tend to keep the design clean and elegant to stand the test of time.

ITS SLIM AND MODERN DESIGN DOES NOT
COMPROMISE COMFORT OR FUNCTION.

The **Norsap 1100** series offers a modern design solution with comfort and ergonomics in mind. The seat features various adjustments to allow for the best ergonomic position when seated. Standard adjustments are the backrest, seat position on glide rails, 360° rotation, gas-dampened height adjustment, flip-up armrests and fold-up footrest. The chair is mounted at a 150 mm x 200 mm oval column or a 100 mm diameter column, creating a firm base for the footrest and seat. The flanged base is designed for permanent deck mounting but can also integrate with an optional deck rail solution.

THE BEST CHAIRS DON'T DRAW YOUR FOCUS -
YET SOME CAN'T HELP BUT TURN HEADS.

The **4000 Agile** is a further development of the Norsap 4000 Impulse, where the 4000 Agile makes it possible to sit or stand without leaving the chair or controls. Perfect for long days where the demand for focus and precision is vital to get the job done.

NORSAP

AGILE

You don't want to think about your chair. You're in the world's toughest environment, you have a job to do, and you're under pressure. Your chair should be the last thing on your mind.

There isn't much you can take for granted in this world, but you should be able to trust that your chair will offer support, comfort and security.

When you need to stretch your legs during an extra challenging shift or get a better overview, you shouldn't have to worry about taking your hands off your tools or finding the right moment.

You shouldn't even have to think about it. Your chair should stand up with you; the seat should get out of your way. Just like that. Effortless. That is Norsap 4000 Agile.

- Kjetil Johannessen

Marketing and product manager - Norsap AS

NORSAP

PERSONALISED SEATING

TRANSFORM YOUR WORKSPACE WITH A CHAIR THAT'S UNIQUELY YOURS. WITH NORSAP, YOU CAN EXPERIENCE THE PERFECT SYNERGY BETWEEN COMFORT AND PERSONALISATION.

Experience a new level of comfort with Norsap's custom-made chairs, tailored to your unique needs.

With a heritage spanning over three decades, our dedication to providing personalised seating solutions has stood the test. We invite you to enhance your seating experience by personalising your Norsap Chair today.

Select from a diverse range of premium materials, fabrics or leather, each meticulously crafted to harmonise aesthetics with enduring quality.

Whether aligning with your corporate identity or expressing your unique style, our custom colour palette ensures seamless integration into your workspace.

Norsap Basic deck rails are top-, or flush-mounted deck rails with a low height and an elegant design that gives credit to the deck—produced in high-quality aluminum and stainless steel. For rougher use, we recommend the Standard deck rails.

Norsap Standard deck rails are high-quality deck rails designed for all kinds of environments. Stable and solid, which can be released and locked from a sitting position. Produced in high-quality aluminum: delivered top-mounted or flush. For larger chairs and more cables, we recommend the Impulse deck rail.

Norsap Impulse deck rails is a strong, elegant electric rail system for all kinds of environments.
