# MARINE WINDOW BLINDS

---

Anti-glare  
& Blackout

# Introduction

Sola-cure is a globally recognised brand and market leader, supplying high quality window blinds to the marine, offshore, aviation, agricultural and construction industries

Our blinds are synonymous with quality and style at a fair price. In the marine sector, Sola-cure is the first choice for many commercial and private owners, operators, fit-out companies and shipyards.

Sola-cure has developed a reputation for supplying the very best in quality with a prompt, courteous and informative service.

# Anti-glare / Blackout :

## Model variants

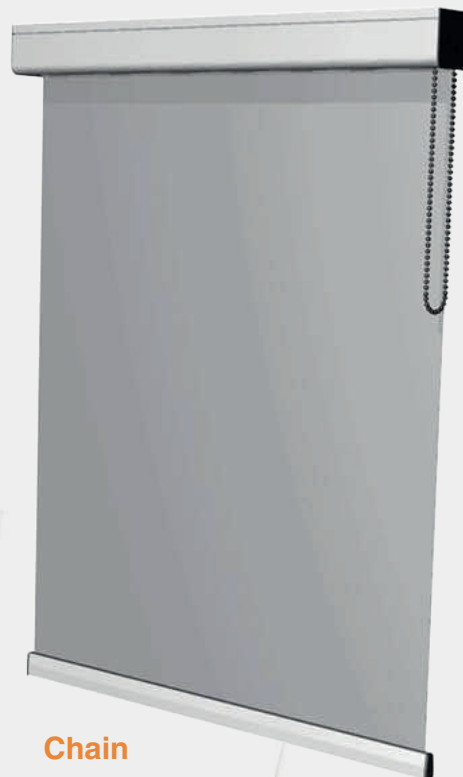

# Optional Methods of Operation

Operating Cord

Remote Control

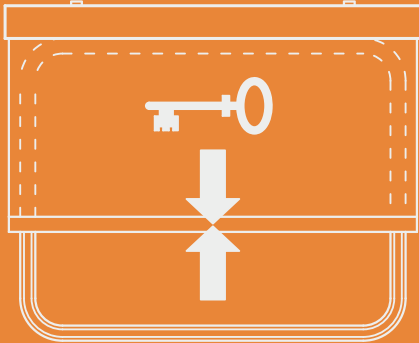

Chain

Handle(s)

# Spring Operated Blinds - Spring options

## **Self-Locking** type spring

When pulling the blind down, either by handle or cord, there are locking positions that hold the position of the bottom rail.

To release from its locking position, a short, sharp pull on the rail will allow the blind to retract.

## **Constant Tension** type spring

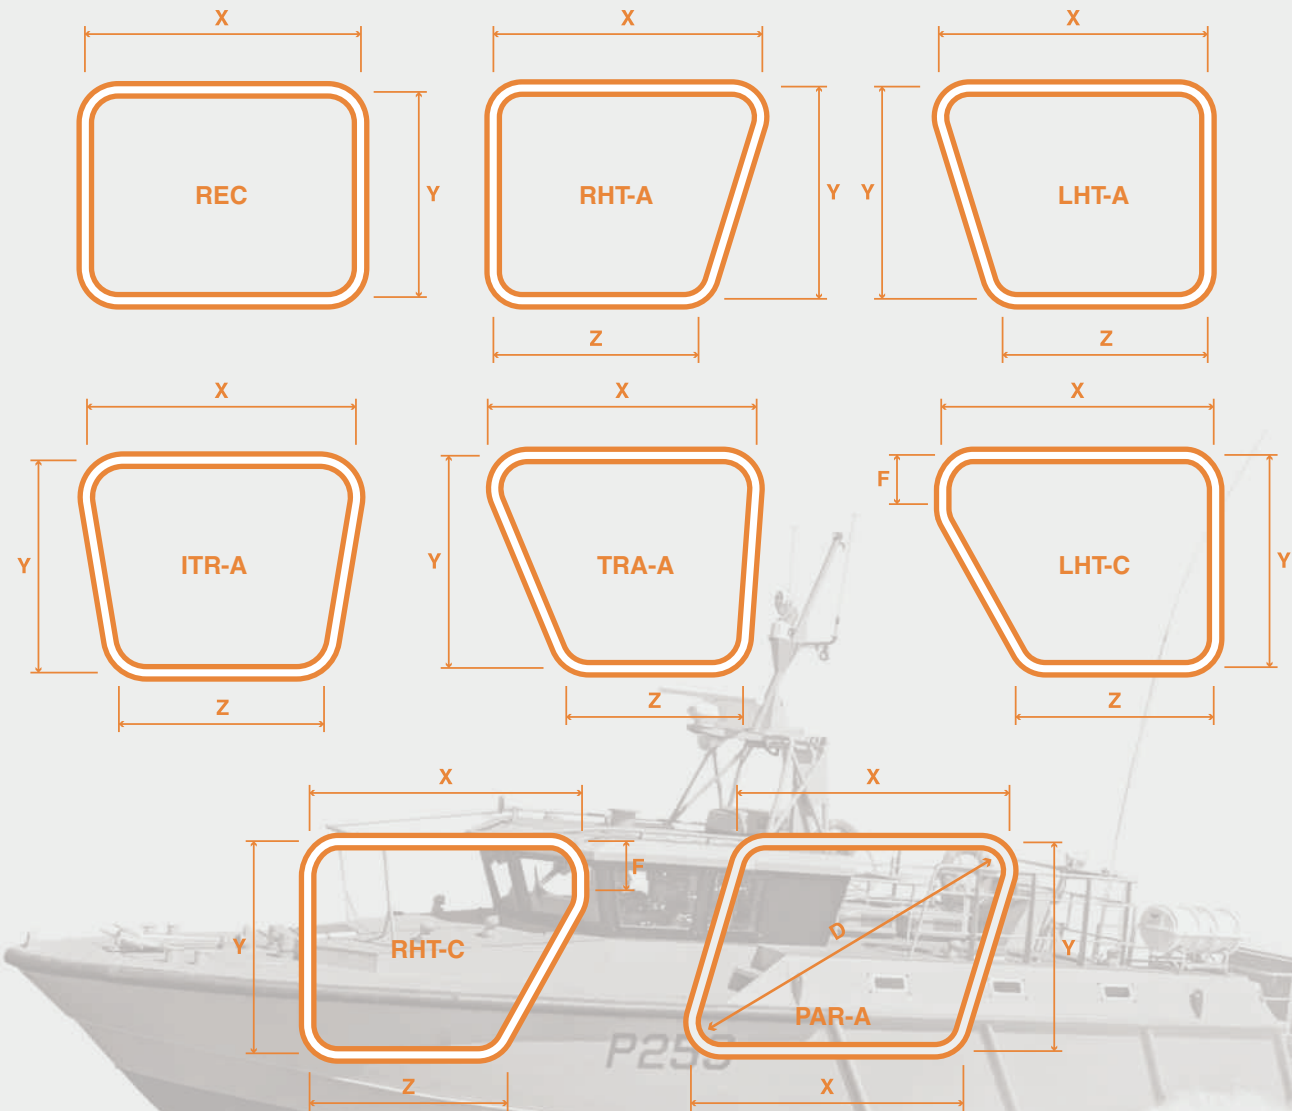

When pulling the blind down, either by handle or cord, the blind will always retract. There is no clutch or locking points.

To lock the blind in position, Sola-Cure offers locking pegs or a cord clamping system.

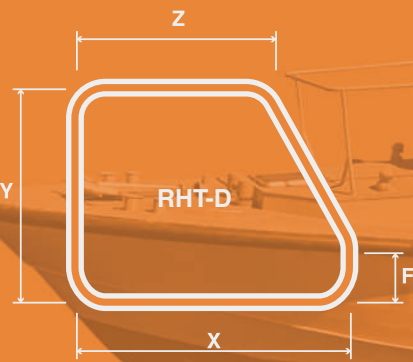

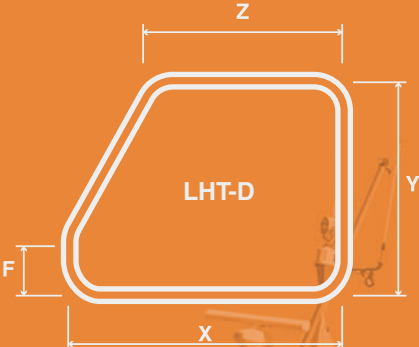

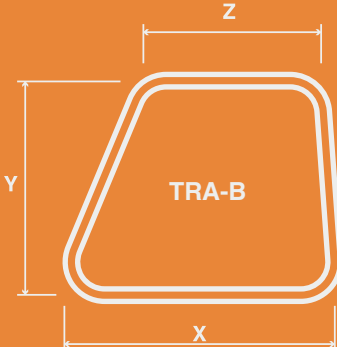

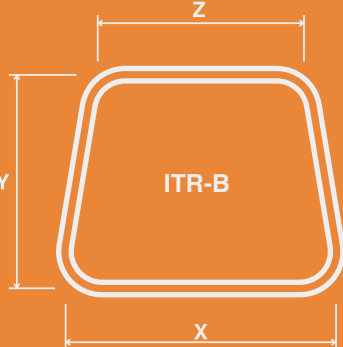

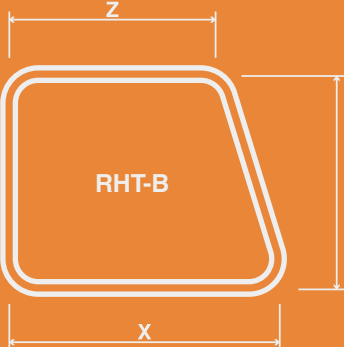

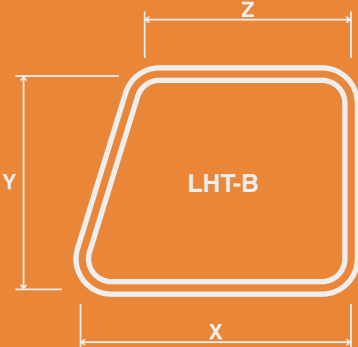

# Window Shapes

All windows shown from inside  
the wheelhouse or bridge, looking out.

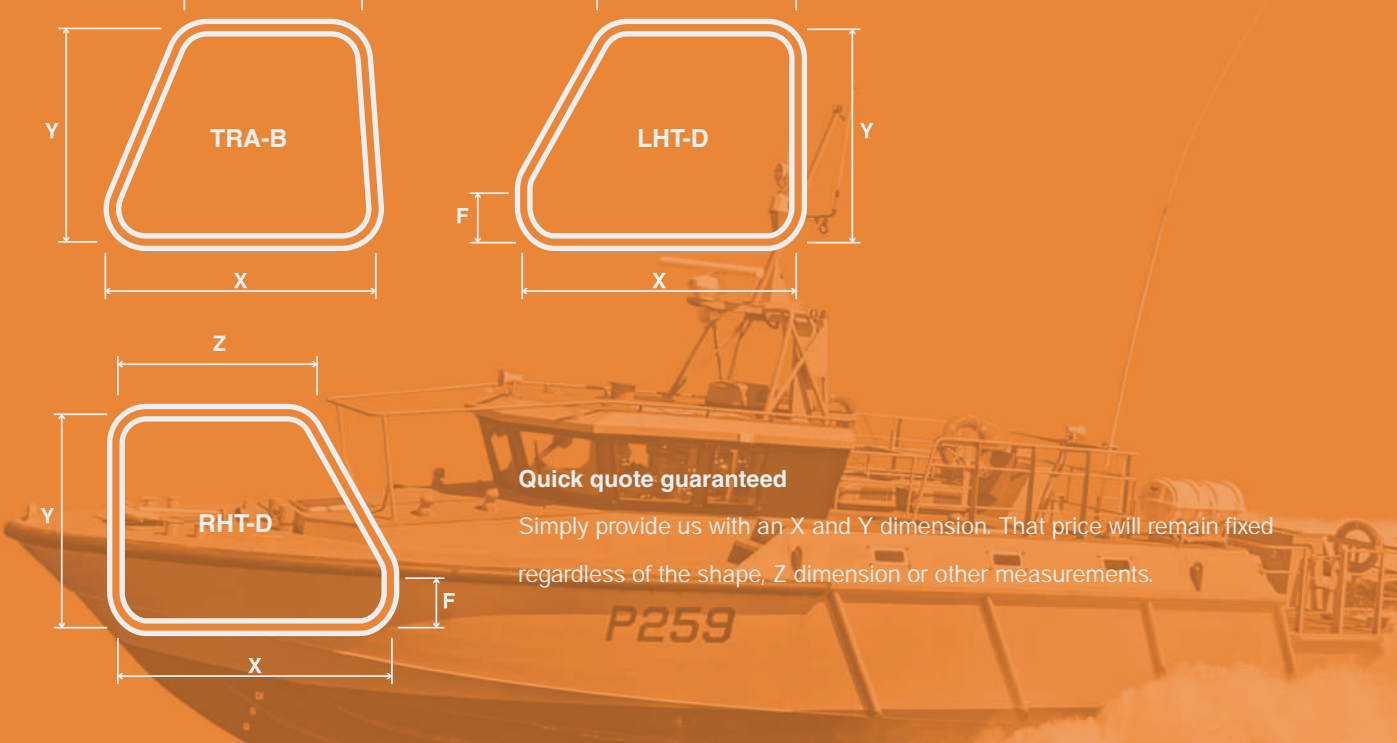

# Window Shapes (cont'd)

All windows shown from inside the wheelhouse or bridge, looking out.

## Quick quote guaranteed

Simply provide us with an X and Y dimension. That price will remain fixed regardless of the shape, Z dimension or other measurements.

# Anti-glare blinds – UV Film

## Features

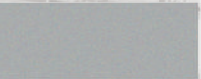

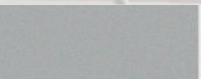

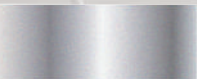

- Certified by ABS
- Cushioned damper system on retraction
- External speed adjustment for retraction
- Glare reduction
- Over 99% UV protection
- Excellent solar energy rejection
- Shades available in grey, silver, gold and bronze
- Suitable for inclined and overhead windows
- Options for stability at sea
- Choice of manual and motorized operation
- Suitable for restricted spaces
- Made to measure
- Supporting CAD drawings in 2D and 3D
- 5 year warranty

## Benefits

- Eliminates glare on monitors
- Improved safety when navigating
- Protects crew from harmful UV rays
- Improves instrument visibility
- Protects eyes from direct and reflected sunlight
- Creates a cooler working environment
- Protects fabric and furnishings from fade

## Anti-glare film Product Information

### Film colours:

	Bronze Bronze	Bronze Silver	Grey Gold	Grey Grey	Grey Silver
Internal					
External					

# Anti-glare blinds - Fabric - Tranquillity

## Features

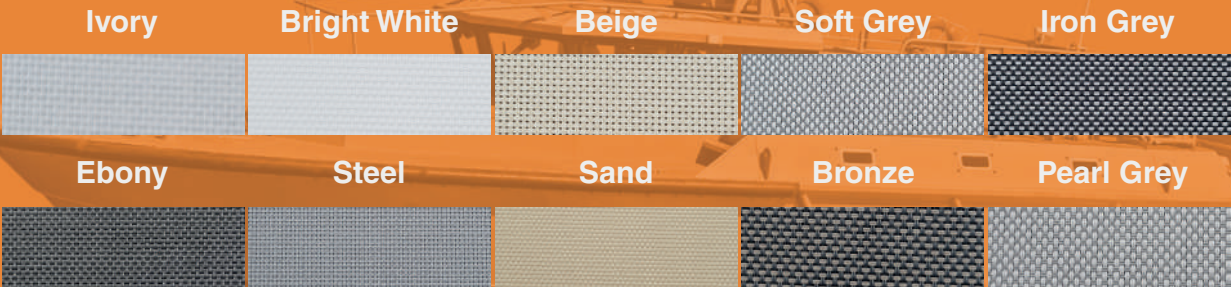

- Marine standard fire compliant to IMO FTPC Part 7
- Cushioned damper system on retraction
- External speed adjustment for retraction
- Glare reduction
- Bacterial and fungal resistant ASTM G21 and G22
- Shades available in 10 colours
- Suitable for inclined and overhead windows
- Options for stability at sea
- Choice of manual and motorized operation
- Suitable for restricted spaces
- Made to measure
- Supporting CAD drawings in 2D and 3D
- 5-year warranty

## Benefits

- Eliminates glare for passenger comfort
- Reduced temperature, lowering A/C operating costs
- Protects crew and passengers from harmful UV rays
- Improves passenger visibility
- Protects eyes from direct and reflected sunlight
- 10% openness allows enough light for a comfortable working environment
- Protects fabric and furnishings from fade

## Tranquillity : anti-glare Product Information

### Fabric colours:

# Non-Marine Applications

Air traffic control towers

Cranes

Security booths

Oil rigs

Outside of the maritime sector, Sola-Cure has identified many applications in which anti-glare blinds have proved to be incredibly popular. As such, Sola-Cure offers an alternative utilising the same high-quality film.

# Non-Marine Applications

## Common Applications

Air traffic control towers  
Crane cabs  
Construction cranes  
Agricultural vehicles  
Security rooms  
Rigs and offshore platforms  
Offices

## Features

Smooth high quality damper system during retraction  
Elegant external appearance  
Available in grey, silver, bronze and gold film  
Special one-way visibility  
Easy to install  
Suitable for inclined windows

## Benefits

Reduces glare  
Aids visibility of monitors and television screens  
Provides daytime privacy with one way visibility  
Aids security  
Reduces air conditioning costs  
Reduces carbon footprint  
Reduces heating costs in cooler months  
Protects employees' skin from harmful UV rays that cause ageing, eye damage and skin cancer  
Prevents fading to fabrics and furniture

# Blackout blinds - Heavy Duty fabric (HD)

## Features

- Marine standard fire compliant to IMO FTPC Part 7
- Cushioned damper system on retraction
- External speed adjustment for retraction
- 4 ply hybrid PVC / fiberglass material
- Anti-microbial
- Shades available in 7 colours
- Suitable for inclined and overhead windows
- Options for stability at sea
- Choice of manual and motorized operation
- Suitable for restricted spaces
- Made to measure
- Supporting CAD drawings in 2D and 3D
- 5 year warranty

## Benefits

- Blackout provided during daylight hours
- Eliminates external night lighting
- Anti microbial properties reduce spread of bacteria
- Durable heavy cloth less prone to damage
- Stain resistant gloss finish provides easy cleaning

## HD : Blackout Product Information Fabric colours:

Jet Black	Arctic White	Beige	Steel Grey
Navy	Cream	Burgundy	Green

# Blackout blinds – Serene fabric

## Features

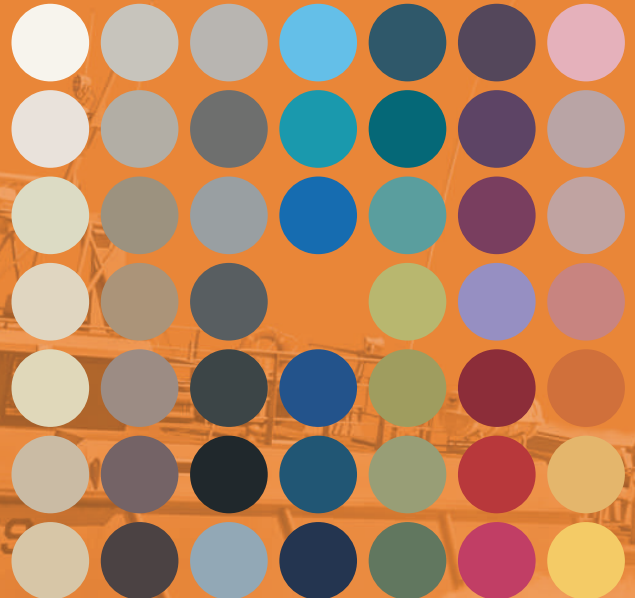

- Marine standard fire compliant to IMO FTPC Part 7
- Cushioned damper system on retraction
- External speed adjustment for retraction
- 100% Polyester
- Anti-microbial
- Shades available in a large range of colours
- Suitable for inclined and overhead windows
- Options for stability at sea
- Choice of manual and motorized operation
- Suitable for restricted spaces
- Made to measure
- Supporting CAD drawings in 2D and 3D
- 5 year warranty

## Benefits

- Blackout provided during daylight hours
- Eliminates external night lighting
- Anti microbial properties reduce spread of bacteria
- Wide of choice of colours to suit corporate branding
- Stain resistant gloss finish provides easy cleaning

### Fabric colours:

# Stability at Sea

## Retaining Pin

## Side Rails

*suitable only for REC shaped windows*

## Wire Guides

# Bottom Mounted Blinds / Overhead Blinds

There's a roller blind solution for almost every window shape. Over many years in the marine industry, Sola-Cure has been challenged to provide a solution for most. An often-raised question concerns overhead windows or those where the window is wider at the bottom than the top.

# CAD Services 2D and 3D Modelling

For peace of mind, Sola-Cure offers 2D drawing services free of charge. Where window shapes generate concerns about glass coverage or mounting position, our 2D drawings demonstrate how the blind will look when installed.

Naval Architects 2D drawings: Our 2D drawing package allows us to upload and scale a PDF. From there, we can take measurements of the vessels' windows and propose window blinds to suit.

On occasions, a 2D drawing just doesn't do the project justice. At Sola-Cure, we have a team of engineers with many years 3D modelling experience.

We can import or model from scratch, a wheelhouse or ATC tower which allows us to model then insert Sola-Cure blinds. We analyse the coverage from any stated viewing position.

At Sola-Cure we use Autodesk Fusion 360 allowing export to .step, .iges and many other formats

# Eyebrow Window Cover

## BESPOKE SOLUTION FOR EYEBROW WINDOWS

**Removable: Compatible with SOLAS regulations**

**Ideal for parallelogram shaped windows / All irregular shapes**

**100% coverage guaranteed**

**24mil (600 Microns) 3-ply anti-glare film thickness**

**Durable and flexible, easy to install – No drilling required.**

**Scratch resistant and robust**

**Store against any flat surface when not in use**

Eyebrow windows on workboats, or other small irregular shaped windows, often found on fast, small workboats have long been a problem when combatting the glare and heat from the sun.

Adhesive films are non-compliant as they cannot be removed.

Roller blinds may not achieve full coverage.

Sola-Cure offers a unique solution. The groundbreaking 'Eyebrow window cover' is a cost effective, safety first solution for Pilot boats, Crew Transfer Vessels, Tug boats and many other workboats and naval craft

# Delivered In Perfect Condition

Sola-Cure are a global supplier of roller blinds. We deliver blinds to every continent and over 30 countries. We attach great importance to ensuring our blinds reach our clients in perfect condition. By their very nature, window blinds are over length consignments and that makes them vulnerable to damage on route to the client.

At Sola-Cure, all blind orders over 5 pieces are shipped in a wooden timber crate, compliant to ISPM 15 regulations. Our crates are lined to protect against water damage and where the gross weight of the crate dictates, we have a forklift base built into the crate for ease of movement and storage.

# Digital Installation Videos

Sola-Cure has made digital installation manuals available for use with smartphones and tablets. Click the links below to watch our 'how to' videos.

Mounting brackets - Face fixing  
(Using the supplied 90° bracket)

Mounting blocks - Top fix  
(Fixing to a horizontal surface)
