

## Standard colors weberfloor

The colour of the flooring is an active part in the visual perception and may take influence on the general condition. That's why the right choice of colour is important for recreation and commercial rooms. Even in the industrial area the colour is gaining influence. We are very aware of this fact and are always trying to satisfy any customer demand. Nevertheless the colour perception is subjective and also depends on a variety of other factors.

<b>Ca. RAL 1001</b>  <b>Beige</b>	<b>Ca. RAL 1015</b>  <b>Light ivory</b>	<b>Ca. RAL 3009</b>  <b>Oxide red</b>	<b>Ca. RAL 5014</b>  <b>Pigeon blue</b>
